

Logan Aluminum's team members reached a major milestone on November 16, 2015. Logan surpassed 4 Million Safe Hours Worked without a Lost Time Injury. This was the fourth time in Logan's history that this has been accomplished. Logan's Team Members were able to do this by Making Good Decisions, Choosing to be Safe and Valuing Their Team Members as Well and Their Own Safety.

This significant achievement was celebrated with a plant-wide meal for all employees and on-site contractors. All Logan Team Members will also receive a coat in recognition of this important milestone in safety performance. Congratulations on another record-setting accomplishment!
